

Mokshith Sanga

+44-7442367431 — mokiviral@gmail.com — linkedin.com/in/mokshith-s-b06ab223a — github.com/moki-s

Summary — Product Manager with end-to-end ownership of product roadmaps, PRDs and delivery across EdTech, e-commerce and health-tech, working directly with founders. Founding-team experience shipping products in Agile/Scrum environments used by clinicians and 1,700+ patients; currently own an LMS serving 1,200 learners and worldwide consumer stores, including one scaled from ~\$100 to \$800–1,000/day in two months. Strong on backlog prioritisation, A/B testing, user research, stakeholder management and data-driven decision-making using JIRA, MongoDB Charts and Excel.

Skills

Product & Technical Delivery

Technical requirements & PRDs, technical specifications, integration architecture & system design, data modelling, product roadmap ownership, MVP definition, backlog prioritisation, Agile/Scrum including sprint planning, stand-ups, retrospectives and JIRA sprint boards, A/B testing, QA leadership using Postman and Sentry, stakeholder management, cross-functional engineering collaboration

AI & Automation

Claude Code, AI agents, Model Context Protocol (MCP), Agent Skills, prompt engineering, LLM integration, AI-assisted full-stack development

Integrations & Platforms

Stripe, Twilio, Resend, Zoho, Facebook Ads, REST APIs, webhooks, Shopify, Moodle, Hostinger

Data & Technical

Python, SQL, JavaScript, PHP, HTML5/CSS, MongoDB, MongoDB aggregations, MongoDB Charts, MySQL, Supabase/PostgreSQL, Microsoft Excel, Figma, Canva

Platforms & Growth

Shopify, Moodle, Hostinger, GitHub, Figma; technical & e-commerce SEO including page speed, mobile responsiveness, crawlability and indexability

Experience

Integer Training Ltd & Shipzo – Birmingham, UK

Nov 2025 – Current

Associate Product Manager

- Own the product roadmap and end-to-end lifecycle of a custom LMS web application serving 1,200 learners, including 800–850 active learners, and 15–20 staff – **authored the PRD, technical specifications and requirements, designed the integration architecture and shipped the MVP via AI-assisted full-stack development** using Claude Code, integrating Stripe payments, Supabase/PostgreSQL, Twilio SMS and Resend email via REST APIs and webhooks.
- Translated operational pain points into technical requirements, replacing 5–6 spreadsheet systems with the LMS – **cut learner onboarding by 15–20 minutes per learner** and automated instalment-payment and assessment tracking, **saving a further 10–15 minutes per learner**.
- Shipped an in-house CRM integrating Zoho via Model Context Protocol and Facebook Ads data, **defining the data model that surfaces lead intelligence to 20+ daily-active sales agents targeting 23+ sales per month**; built “Deal Generator” to automate configurable-deposit payment links and commission calculations.
- Integrated a digitally-signed application form with a third-party student-funding provider (TFSC), **architecting a Stripe-linked deposit flow between the two companies’ systems**; built “Enrol Smart”, an auto-marked initial-assessment tool.
- Built a Moodle e-learning platform from scratch using PHP and Hostinger, designing the role-based access hierarchy for admin, tutor and learner users, error logging, progress and time-per-unit tracking data models, and auto-graded quiz/assessment logic.
- Launched and scaled “Vibrant Lane”, a worldwide AI-generated custom wallpaper store, from **~\$100/day at launch to \$800–1,000/day within two months** – optimised AI token cost per generation, engineered prompts across 5–7 art styles and integrated the payment gateway.
- Drove go-to-market for worldwide Shopify stores including glogummy.com, mamabub.com and optimisation of pocgists.com, applying technical SEO including page speed, mobile responsiveness, crawlability and indexability, and **A/B testing product pages built around ad quizzes, advertorials and listicles to identify winning variants on conversion rate**.

- Launched the Integer Training website with one-time and instalment payment flows, lead-generation quizzes and student-support forms – **generated 300+ enquiries and first direct course sales with an average value of ~£1,300 in launch week.**

DeftRonin Technologies – Healthflex

Mar 2024 – Sep 2025

Product and Operations Associate – Founding Team

- Led full data migration from a third-party EMR, covering patients, SOAP notes, billing and services, owning schema validation, data-model mapping and reconciliation – **zero data loss.**
- Partnered with cross-functional engineering teams to migrate mobile apps from Flutter to React, mapping data keys/fields and validating 9-axis IMU sensor inputs to improve clinician and patient workflow reliability.
- Proposed and piloted a voice-to-structured-form tool using Google STT and LLM workflows that cut clinical documentation time from **20 to 5 minutes per note** – a **75% reduction** – and achieved **93% clinician adoption.**
- Improved data accuracy to **95%** by optimising calibration and troubleshooting workflows for **250+ 9-axis IMU sensors**, enhancing the reliability of patient progress-tracking metrics.
- Directed QA across scheduling, billing, onboarding and reporting modules within an Agile/Scrum delivery cycle, including sprint planning, stand-ups, retrospectives and JIRA sprint boards, **surfacing 30–40% of critical bugs** and delivering **200+ validated sensor-data reports** used in medical decision-making.
- Designed structured rehabilitation protocols informed by user research with clinicians, covering **79% of surgeries and 98% of OPD conditions**; built **2,100+ movement-correction feedback rules** and authored **730+ evidence-based exercise entries.**
- Defined graph structures and test cases for patient-performance visualisations including force, velocity and ROM, and built analytics dashboards using MongoDB Charts and Excel to track revenue, funnel-conversion and plan-adoption KPIs across **3 centres.**
- Drove a comparative cost/quality analysis across **15+ hardware vendors**, cutting unit cost by **43%** from 190 to 108 with **zero user complaints** on the chosen ergonomic, skin-safe device.

SysTools Pvt. Ltd

Jun 2023 – Jul 2023

Digital Forensics Intern

- Performed on-site forensic imaging of electronic devices across multiple locations using **FTK Imager and MailXaminer**, ensuring evidence integrity for investigative processes.

Projects

Stance Dashboard – B2B

Mar 2025 – May 2025

Microsoft Excel, MongoDB Aggregations, MongoDB Charts, Postman API, JIRA, Figma, Uizard

- Spearheaded the end-to-end launch of a B2B clinic operations dashboard used across 3 centres serving 1,700+ patients; collaborated with frontend and backend teams to ensure timely delivery and seamless integration.
- Refined UI/UX designs and executed comprehensive testing using Postman API and Excel-based data validation, managing bug reporting, prioritisation and resolution in JIRA to maintain high system reliability.
- Built dynamic dashboard views using MongoDB aggregations for modules including calendar scheduling, staff rosters, patient/doctor management and billing; incorporated customer feedback to rapidly deploy new features and drive user adoption.

Development of Malware for Windows OS-Based System

Jan 2024 – May 2024

Metasploit Framework, msfvenom, msfconsole, C/C++, Windows API, Process Explorer, NTDLL/NTAPI references, WDK docs

- Implemented and tested advanced Windows malware techniques including shellcode, DLL and NTAPI injection in a controlled lab using Metasploit and C/C++; demonstrated stealthy process injection methods and payload execution.
- Analysed attack vectors and proposed defensive countermeasures including endpoint detection, memory monitoring and threat intelligence practices, improving understanding of malware evasion strategies and security response.

Education

University of Birmingham, Birmingham, United Kingdom

Sep 2025 – Sep 2026 (Ongoing)

Master of Science in Advanced Computer Science

Dayananda Sagar University, Bangalore, India

Dec 2020 – Jun 2024

Bachelor of Technology in Computer Science and Engineering – Cyber Security

CGPA: 7.89
